The men persons in charge of the party explained that the young women were sent to the White house to be considered the most representative young women of their state.

"Quite unique," murmured Mr. Taft, "but I am sure they are the most representative young women of their state."

Then, according to the girls, the president lapsed into a state of "blue funk," and seemed to be completely overcome by their presence. He shook hands with each of them and wished them a pleasant trip on the rest of their journey, but then, when the young women filed out they were in love with the president, but they said unanimously that he "fell down" when it came to paying them compliments.

Lantern Identified by a Wick Made from a Felt Hat.

Grundy, Va., Nov. 25.—Great progress was made on this, the first day of the trial here of Howard Little, charged with murder and arson at the trial of the late Mrs. Little. Within half an hour after the court convened a jury was secured. The court room was crowded and a special guard was placed at the jail to prevent any trouble.

Little's alleged victims were Mrs. Little and her two children, a family named Meadows.

The strongest evidence against the accused was the testimony of Mary Lee, who testified that the lantern which Little brought with him after spending the night the murders were committed was a felt hat.

Other witnesses testified that the lantern was the property of Meadows. She identified it by a wick made from the Meadows house.

At the trial of Meadows, the testimony was admitted, but only after a protest by counsel for the defense. This evidence tended to show that Meadows was in the house at the time of the crime, as it is known that the lantern was at the house when the murders were committed.
